Integer Research Prepares for DEF Forum

7/7/2009

Integer Research will hold its Diesel Exhaust Fluid Forum 2009 at the Mandalay Bay in Las Vegas on Oct. 8-9.

The event will be a forum for discussing key issues surrounding the selective catalytic reduction truck markets and diesel exhaust fluid supply infrastructure as new emissions regulations come into effect. It will be a gathering of fleet managers, truck stop owners, OEMs, truck manufacturers, government fleets, procurement, logistics and business development professionals.

Sponsored by the Petroleum Equipment Institute, the conference will take place in conjunction with the American Trucking Associations' annual meeting.

The conference will cover:

- * How transport companies make SCR investment decisions in the current market
- * DEF pricing factors that will influence the roll-out of DEF supply in 2010
- * SCR truck customer expectations and education
- * Retrofit markets for SCR equipment and DEF supply
- * Public transport challenges for SCR vehicles and DEF supply
- * DEF quality control and licensing developments
- * New emissions control technologies and impact on performance, economy and DEF consumption
