TA and Petro locations stock DEF

By Lanier Norville

6-16-2009

All TravelCenters of America (TA) and Petro Stopping Centers (Petro) locations are now stocked with 2.5-gallon containers of DEF for retail sale, TravelCenters of America announced. DEF is also available to all emergency roadside assistance vehicles at TA and Petro locations for trucks that run out of DEF on the highway. TA and Petro are the first travel centers to offer these containers, TravelCenters of America said. The vented bottle style, supplied by Colonial Chemical Company of Tabernacle, N.J., includes an extended nozzle. For more information visit [.](#)
